Volume 2 Issue 1

April 2015

### Happy Spring!!!!

#### Brutal Winter Season

What a Winter we had! It started out pretty easy and then slammed us hard. Storm Juno wasn't as bad as predicted, at least for our area. Good thing we don't live in Boston! We use a certified weather reporting service to verify snow totals for use when invoicing. Their certified weather totals for Nashua was 114 inches of snow! Nashua's average snowfall is 54 inches a season and we doubled that and then some this season. We also nearly doubled it last season as well with a total of 104 inches. Lets hope next Winter is mild!!!!

**Our pink plows** were seen all over Amherst, Nashua, Manchester, Merrimack, Milford, Bedford and Hollis! We're continuing to raise awareness for breast cancer and have an exciting new project lined up for this year. Details to follow soon.....!

#### Winter Kill

Hard Winters with lots of snow cover and below average temperatures take a toll on plantings. Snow loads break trunks and main supporting branches. We lost a few bushes, shrubs, trees and small plantings at customer's homes last year. Some bushes and shrubs only partially came back during the summer. We expect many more damaged plants after this Winter. We can inspect your plantings and trees after the snow melts for damage. Nurseries are expecting higher than normal orders and have provided price lists early this year. If you've lost plantings and wish to replace them or just want to change your beds up give us a call.

#### Jake has a son!!!

Our lead man, and tree guru, Jacob Saunders, had a new addition to his family this year! On January 13th Paula brought a handsome little boy, James Patrick Saunders, into the world. We can't wait to follow him as he grows up. I'm sure he'll take after his daddy's love for the outdoors.

## Our latest Angie's List review and our response

### Our customer's review

We moved to Amherst in October 2013. Did not know anyone, but through some stroke of good fortune, we contacted Paul Koehler for landscaping. He rescued us then, clearing up a nightmare of leaves and overgrown brush. He has continued to rescue us. He takes care of our spring cleanup, Sprinkler shut off and turn on and mowing as well. What impresses us most about Paul is that he is 100% reliable, honest and professional. More than that, he has become a true friend...more than once we had quirky home problems and he was here in a flash. Paul really cares!!!! Just as important, his team mirrors his work ethic - they are responsible, courteous and do a wonderful job! We HIGHLY recommend Koehler Landscape Construction Services, Inc.

**Mrs. Vivian Kirkfield**

### Our response:

You are definitely one of our most favorite customers! Thanks for the awesome review. We passed it on to the crew and they wanted me to tell you they appreciated it too. We do not solicit reviews so when we see one in the inbox it is great to see who its from and what they say. You've quickly become a friend and I'm looking forward to taking Stuart fishing this summer. Thanks too, for supporting a local small business. We work hard to give back to our community, including one that is close to your heart as a writer, the Amherst Public Library. We support Friends of the Amherst Town Library Student Art and are looking forward to seeing your grandson's art work displayed there too.

Thanks also for helping us support a cause that is close to our heart, New Hampshire Breast Cancer Coalition. We are really fueled to give to their Support Services Fund. It goes directly to local families affected by breast cancer. Our customers make this possible. Thanks again and we look forward to seeing you in a couple of weeks!

### Customer Highlight

Vivian Kirkfield has been a customer of Koehler Landscape Construction Services, Inc. since 2013. " We got to New Hampshire just in time to enjoy the amazing fall foliage. Trees wearing headdresses of scarlet and gold were beautiful...until the leaves started falling, and falling and falling. The lawn was a multicolored carpet...lovely to look at, but not so good for the grass underneath." She went on to say, "Hiring Koehler Landscape would probably be the best move any homeowner could make. Knowledgeable, dependable and courteous, Paul is not only our landscaper...he has become a trusted friend. We are seniors and one day during the winter, we had what turned out to be a leak from the refrigerator ice-maker hose. Unable to move the fridge and worried the water would damage the basement below, we called Paul. He was at our home within minutes, even though refrigerator hoses are not part of his landscaping repertoire. Would we recommend Koehler Landscape? You bet we would! " She stated the following in a recent interview, " Paul Koehler is a gentleman - and a gentle man...he runs his company and directs his team with confidence and strength. It is a pleasure doing business with such a fine person."
